## PIPELINE PROTECTION MESH

### PRODUCT DESCRIPTION / TECHNICAL DATA

**ROCKGUARD® HD Rock Shield Pipeline Protection Mesh** is a three dimensional bi-planar extruded diamond structured mesh manufactured from polyethylene. It offers a consistent thickness throughout the width of each roll or pad to provide full protection to your pipeline during backfill operations, and after installation, prohibiting geologic movements from damaging the pipe and minimizing holidays that cause corrosion.

**ROCKGUARD® HD** is flexible for easy handling, even at low temperatures. Chemically inert, **ROCKGUARD® HD**, will not rot and the open mesh design allows water to flow freely over and off the pipeline. **ROCKGUARD® HD** aperture design ensures that cathodic protection is not inhibited.
